DEVAL ABRASION TEST MACHINE

Used for testing the abrasion resistance of aggregates. The machine consists of a rotating frame to support two steel cylinders complete with covers and locking device. The rotating frame is driven by a motor speed reducer and an automatic counter is included to pre-set the required number of revolutions.

- Rotation speed: 33 r.p.m.
- Power: 736 W
- Overall dimensions: 1500x500x700 mm
- Weight approx.: 190 kg

DEVAL ABRASION TEST MACHINE

STANDARDS

- NF P18-577

ORDERING CODE

48-D0523/G

Deval attrition test machine conforming to NF P18-577. User interface: large size graphic display and membrane keyboard. 230V, 50Hz, 1ph.

48-D0523/GZ

Deval attrition test machine conforming to NF P18-577. User interface: large size graphic display and membrane keyboard. 110V, 60Hz, 1ph.

48-D0523/GY

Deval attrition test machine conforming to NF P18-577. User interface: large size graphic display and membrane keyboard. 220V, 60Hz, 1ph.
